

Objectives

The Third International Conference on Aeronautical Sciences aims to reunite leading academic scientists, researchers and PhD students to exchange and share their experiences and research results about all aspects of Aeronautical Sciences, and discuss the practical challenges encountered and the solutions adopted. The conference will highlight advances in aeronautic sciences in the following technical topics:

1. Computational Aerodynamics
2. Experimental Investigations in Aeronautical Sciences
3. Materials and Structures in Aeronautics
4. Flight Mechanics and Systems Integration
5. Flight and Propulsion Physics
6. Combustion
7. Control of UAV's
8. Design of UAV's.

Conference proceedings

The International Refereed Conference Proceedings will be blind peer reviewed by three competent reviewers. The conference proceedings book & CD and certificate presentation will be distributed to the conference participants at the conference registration desk.
