

The **1st International Conference on the Energy and Digitalization Transition in the Maritime Sector ICEDTMS** is a high-level scientific event designed to bring together researchers, professionals, political decision-makers, engineers and economic actors to discuss the major challenges of decarbonization and digital transformation of the maritime sector.

The conference **aims** to foster international dialogue between researchers and professionals, present the latest scientific and technological advances, highlight pilot projects in port digitization and green logistics, encourage the creation of interdisciplinary collaboration networks between laboratories, universities, companies and public institutions, and support public policies and sector roadmaps towards carbon neutrality and digital optimization.

The **sectors involved** range from shipping, shipbuilding and port authorities, to artificial intelligence start-ups, energy operators, universities and research centers.

CONFERENCE TOPICS :

Topic 1 : Energy transition in the maritime sector.

Topic 2 : Digitalization of the maritime sector.

Topic 4 : Maritime regulations.

Oran is the second largest city in Algeria and one of the most important in the Maghreb. It's a charming port city in north-west of Algeria, 432 km from the capital Algiers, with a rich history, varied architecture and a unique Mediterranean atmosphere.

Oran covers an area of 2007 Km². This wilaya has managed to preserve its identity. It is considered the cradle of raï music.

The great Abdelhamid Ibn Badis mosque, the bey's palace, the Santa Cruz fort and chapel, the old town (sidi elhouari), the Place 1er Novembre, the Sacré Coeur cathedral (Library), the seafront, the Oran theater, Mdina jdida: these are just some of the places not to be missed in Oran.

Welcome to Oran
